

Copper Powder Coat Finish shown.

Job Name	
Model	WS-GFT-3521-BRL
Item#	

FEATURES

- Cooks Like Clay
- Long Lifespan
- Durable Ceramic Interior
- Consistent Reliable Heat
- Custom Finishes Available

The Wood Stone gas-fired Barrel Tandoor features a cooking chamber that uses the same ultra-strong, high-temperature ceramic technology that we utilize in our stone hearth ovens.

The ceramic cooking chamber has a 12-inch opening and is encased in an eye-catching powder coat finish that is fully insulated. The Tandoor is topped with an attractive and durable quartz composite that simulates the look of black granite. A Naan Hook, Naan Scraper and Skewers are included with the unit.

The gas burner uses a pilot safety valve, equipped with a Piezo-Electric ignition system. The heat output of the burner can be adjusted from its highest setting to completely turned off (or any setting in between) by turning the Flame Height Control Knob, which is located on top of the control box.

The Tandoor comes with a lightweight, ventilated lid for faster heat-up and a Skewer Indexing Ring to support and position skewers. A removable drip/debris pan is located beneath the unit.

Wood Stone Tandoors can be configured to burn Natural Gas or Propane—this should be specified at the time of order.

The Barrel Tandoor is supported by 4 legs which are adjustable to allow for leveling. The adjustable height of the unit on a level floor is 35.25 to 36.25 inches. An adjustable base trim piece is provided to seal the unit to the floor.

Wood Stone Barrel Tandoors arrive completely assembled, ETL Listed, ready to install, and are made in the USA. Information about custom finishes, tools and accessories can be found online at: woodstone-corp.com.
