

Left-Hand drive configuration with six spits shown.

FEATURES

- High Production
- Durable Construction
- Front or Rear Load and Unload
- 6 or 10 Spit Options (6 Spit Shown)
- Gas Charbroiler Option
- Custom Accessories
- Beautiful Live Flame

Job Name	
Model	WS-GFR-(6, 10)
Item#	

The body of the Cascade Rotisserie is constructed of 16-gauge polished stainless steel and is powered by a 1/4 hp variable speed DC motor with soft start and stop. The rotisserie drive features a rugged two-stage gearbox and comes standard with six 44-inch stainless steel angle spits, giving the rotisserie a 36–42 chicken capacity. The optional 10 spit model, with all 10 spits in place, is suitable only for chicken and has a capacity of 60–70 birds. The rotisserie is heated by two burners: a showy and powerful adjustable wall of radiant flame at the front of the cabinet and an overhead IR burner.

The Cascade features a constant drip water bath, so that grease from the cooking products is constantly being removed from the cabinet. The water bath is equipped with a removable drain plug for easy cleaning. The standard rotisserie has rear doors and a bump-bar style shutoff on the front. Front and rear controls facilitate easy loading and unloading from either location.

The controller and motor can be located on either side of the unit—this must be specified at the time of order. The Cascade is easily serviced via an access panel located on the drive side of the unit.

The unit is ETL Listed and made in the USA. Information about additional tools and accessories can be found online at: woodstone-corp.com.

An ongoing program of product improvement may require us to change specifications without notice.

CASCADE

GAS-FIRED ROTISSERIE • WS-GFR-#

Note: The drive side is determined from the rear of the unit and can be installed on either side of the unit. The right-hand drive model mirrors the left-hand drive model (shown below) exactly. Drive side must be specified at the time of order.

This unit is on casters; utility hookups be made in such a way as to allow mobility of the rotisserie for service and maintenance purposes. We recommend "quick disconnects" and flexible connections. All utility connections are made from the underside of the appliance.
