- Long Lifespan
- Durable Ceramic Interior
- Consistent Reliable Heat
- 35" Model Also Available
- Round and Square Shapes Available
- Fits Through Standard Doorways

TANDOOR 31" GAS-FIRED TANDOOR

Job Name	
Model	WS-GFT-31
Item#	

The Wood Stone gas-fired Tandoor features a cooking chamber that uses the same ultra-strong, high-temperature ceramic technology that we utilize in our stone hearth ovens.

The unit is available in a round, square and octagonal shape. The ceramic cooking chamber has a 12-inch opening and is encased in an insulated, stainless steel cabinet. The Tandoor is topped with an attractive and durable quartz composite that simulates the look of black granite. The entire unit sits on heavy-duty casters and includes a Naan Hook, Naan Scraper and Skewers.

The gas burner uses a pilot safety valve, equipped with a Piezo-Electric ignition system. The heat output of the burner can be adjusted from its highest setting to completely turned off (or any setting in between) by turning the Flame Height Control Knob, which is conveniently located on the top of the unit.

The Tandoor comes with a lightweight, ventilated lid for faster heat-up and a Skewer Indexing Ring to support and position skewers. A removable drip/debris pan is located beneath the unit.

Wood Stone Tandoors can be configured to burn Natural Gas or Propane—this should be specified at the time of order. Restraint anchors for a flexible gas supply line restraining cable are located beneath the unit. The 31-inch round footprint of this unit makes it easy to fit through standard doors and into an existing cook line.

The unit may be ordered with a caster riser assembly to increase the height of the Tandoor to 36 inches, enabling easy installation into a cooking suite.

Wood Stone 31" Tandoors arrive completely assembled, ETL Listed, ready to install and are made in the USA. Information about custom finishes, tools and accessories can be found online at: woodstone-corp.com.
