WOOD  STONE

WINTER 2026

# RICE COOKER

Flexible & Scalable.  
Simple Operation. Perfect Results.

WOOD  STONE

# A COUNTERTOP UNIT THAT COOKS IN 1/3 SIZE PANS

## Quality Rice

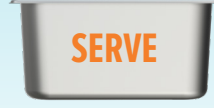

Consistent and repeatable

## Ease of Use

Eliminates heavy, bulky rice pots

## Flexibility

Cook 1, 2, or 3 recipes independently

*in the*  
**SAME PAN**

## Consistent Quality Rice

Our patented technology allows for precise cooking profiles and increased consistency. Rice is evenly cooked throughout with no overcooking or burning.

## Easy & Safe

Reduce employee training and eliminate steps in your rice cooking process. Just pour rice and water into the pan, cover, select rice type, press start, cook, remove the pan, and place it directly in the holding cabinet or serving line—with less food handling, there is a lower risk of food contamination.

## Flexibility

Continuously cook 1, 2, or 3 pans independently. Cook different products, in flexible batch sizes, on demand or all at the same time.

## Reduce Costs & Downtime

Using less energy and labor, with less waste. No large bowls to clean and handwash, less overcooked rice is wasted, with up to 40% energy savings.

## Cook Quality Rice with Less Energy

Our Rice Cooker cooks consistently, in a variety of profiles and batch sizes, with less waste.
